Profile

Jeremy is a university student looking for an intership or graduate opportunity to learn about and familiarise himself with the professional environment. A friendly individual who is always eager to learn, Jeremy has developed a strong passion for data analysis, modelling and predictions, and is keen to dive deeper into these fields.

Internships

Spenda - Software Engineer

10/2020 - 6/2021

Developed the 'Blue Dorsal Suite', which consists of various bots which interact with the Azure Devops API to manage, handle and control the company's agile processes, as well as send out various data and reminders to work-from-home employees to easen their transition

REED - Telecommunication Mapping

05/2020 - 10/2020

Performed research into regional WA to investigate ways in which various forms of telecommunication such as Wifi and mobile broadband could be improved to accellerate urbanisation in high potential areas

Personal Projects

PLEASE App

A medical app for terminal cancer patients suffering from pleural effusion to report health, for professor use at Charles Gardener Hospital for ios and android

Cryptocurrency Trading Bot

A trading bot that utilises the Binance api to automatically make trades based on various technical indicators and statistical analysis

YEETCode

A LeetCode clone, where users can practice their algorithmic skills on various problems maintained by an admin account
